DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it is too long. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by De Witt, U. S. Patent 5,388,359. De Witt teaches a sign bracket comprising a frame member 36, 38, and 39 for carrying sign (not labeled) between the panels 39 and 38 and a mounting bracket 10 for removably securing the sign to the top of support. The frame has a post 30 adapted to fit within aperture 26 to provide a means to incremental rotation of the frame. The bracket comprises an inverted U-shaped member and a screw 17 for attachment to the support.

Allowable Subject Matter

4. Claims 10-20 are allowed.

5. Claims 4-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
